THE PROBLEMS

F

- Slow or incomplete payment processes.

FLO

- Reduction in errors of orders & deliveries.
- Inaccurate master data.
- Reduced holistic visibility due to system infrastructure complexity.
- Spiralling maintenance and IT support costs.

FLOS

- Multiple standards and platforms across scaling businesses.

FLOW

- Labour saving and manual checks.

FLows

- Multiple points of failure due to a complex system infrastructure.
- Ensuring data integrity across all types of businesses.
- Difficulty with onboarding small suppliers.

WHAT DATA-XCHANGE SOLVES

- Offer faster payment and financial settlement options.

- Instantly identify exceptions and errors.
- Reduce errors concerning master data.
- Create a custom dashboard to achieve complete business visibility in one place.
- Compliment or replace EDI, online portals, and point-to-point integrations.

- Utilize GS1 and Microsoft compliance standards.

- Labour saving on manual checks.

- Seamlessly work with Oracle, SAP, Sage, Microsoft Dynamics, and other similar software.
- Ensure that all data moving between your core systems is accurate.
- Facilitate trading between small and large businesses alike.
