

## PROJECT COLLABORATION FOR DESIGN AND CONSTRUCTION - IFS PROJECTS LIVE™

IFS Digital Project Manual PRO™ is IFS Projects Live™ is a cloud-based Project Collaboration application which enables all project teams to share information (planning documents, drawings, safety files...), and communicate in real-time.

The application provides & delivers a structured and project specific process for the setup and management of each projects Master Planning, Pre Design, Design & Construction information. Sites/projects can be added securely and strategically when required, setting in place and ensuring that all Design & Construction information from planning to construction completion is set-up and managed to the highest standard.

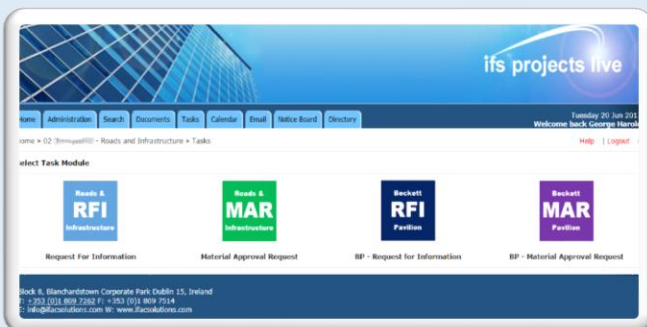

### Manage Project Information

- Set-up a Common Data Environment (CDE) Framework
- Manage multiple projects on a secure on-line platform
- Provision the system and project teams within days
- Manage user profiles and role based permissions
- Approve document management protocols
- Customize forms and KPI's for RFI's and Submittals
- Configure project dashboards and activity reports
- Access on-line video, remote & site-based training
- Secure on-line / off-line project Archive post completion

### Design & Construction Collaboration

- Intuitive and user-friendly project dashboards
- Access Design & Construction activities in real-time
- Flexible Project Information Management
  - Master Planning, Bid Management, Design & Construction
  - Secure document management module with revision control and automated e-mail alerts
- Integrated file viewer, view and mark-up multiple file formats in your browser without CAD software
- BIM Model Viewer Integration supports Model Validation

### Effective Project Management

- Schedule meetings and monitor the status of actions
- Manage Dynamic RFI and Technical submittals workflow
- Tracks outstanding issues to avoid potential contract delays
- Report project progress to all stakeholders
